要如何修改期刊縮寫？
→ 匯入 Journal term list

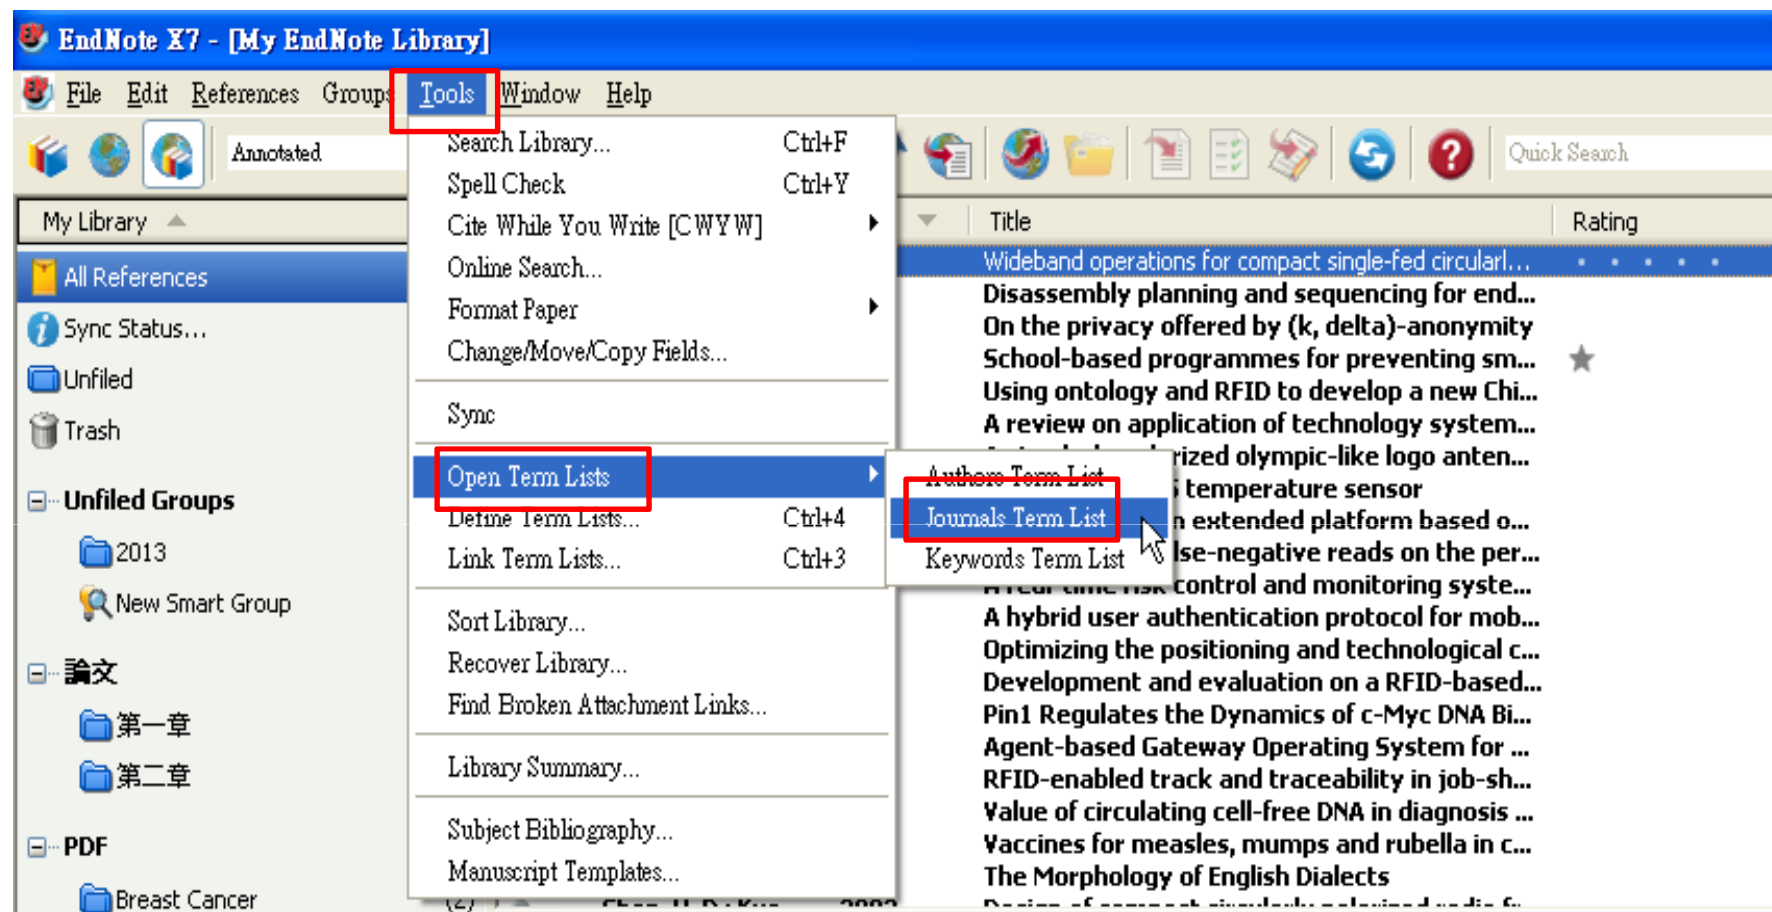

何時需修改期刊縮寫

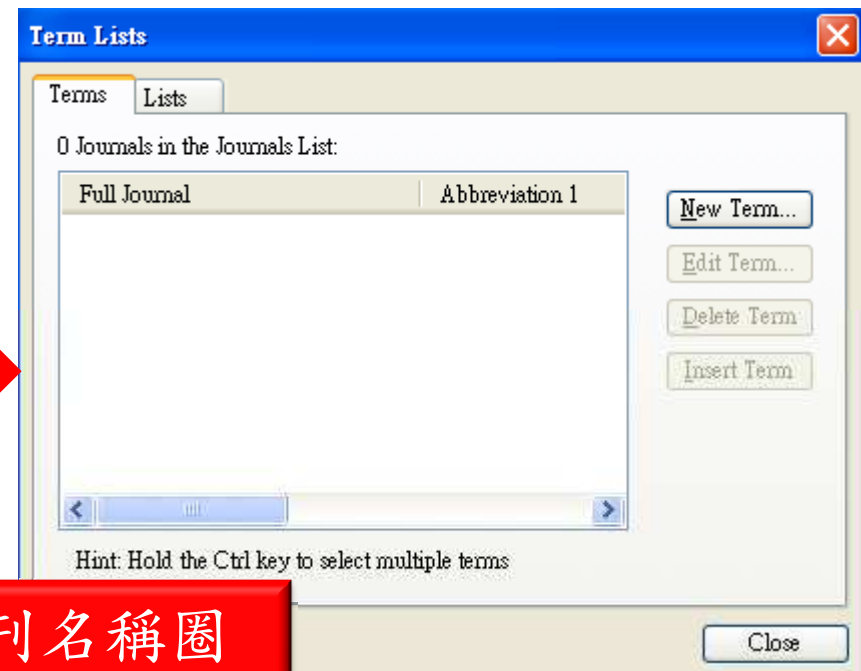

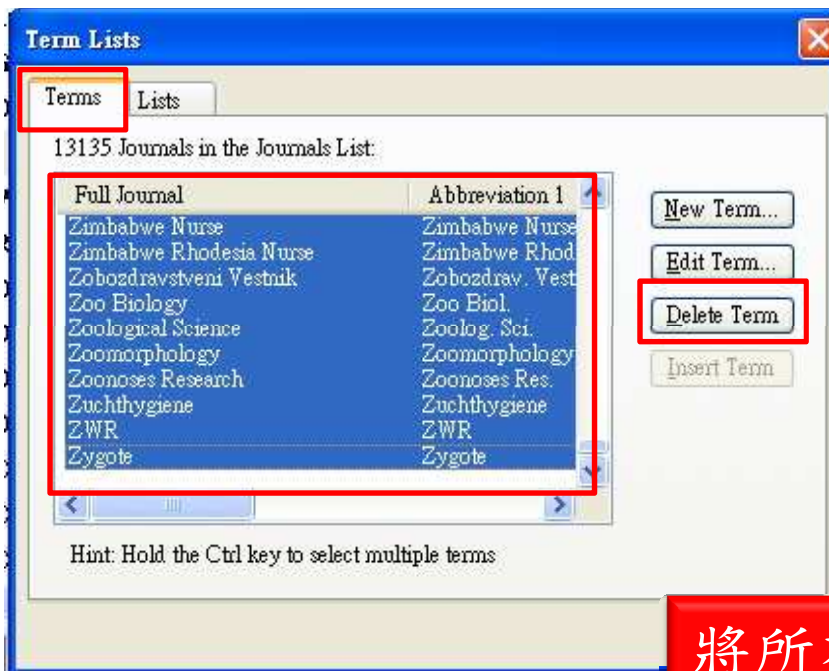

- 當下載一筆書目進入 EndNote 時，系統會自動由下載的書目中擷取資訊建立刊名。如果下載時該資料庫的書目欄位中並未提供正確的縮寫刊名，其所建立的 Journals Term List 就不會有縮寫刊名；又或者下載時有縮寫刊名但其縮寫格式並非使用者想呈現的格式時，在編排論文的 Referances 時可能就會產生問題

修改期刊縮寫

- 方法一：匯入內建Term list
- 方法二：自行編輯

注意事項

- **【Journals Term List】** 的匯入是適用於個別的 EndNote Lib，因此如果使用者有多個 EndNote Lib 就必須分別執行匯入，並非一部電腦只需要匯入一次。
- 如果已經採用 **【方法一】** 匯入期刊縮寫清單仍沒有相對應的縮寫格式，那就必須以 **【方法二】** 單筆修正資料。

References

In the main text, tables and figure legends:

- References should be identified using superscript numbers, be numbered consecutively in order of appearance in the text, and be placed after punctuation.
- References cited in tables or figure legends should be included in sequence at the point where the table or figure is first mentioned in the main text.

In the References section:

- References should be limited to those cited in the text and listed in numerical order, NOT alphabetical order.
- Do not cite abstracts unless they are the only available reference to an important concept.
- Do not list uncompleted work or work that has not yet been accepted for publication (e.g. personal communications, unpublished data) as references.
- References should include, in order, author names, article title, journal name, year, volume, and inclusive page range numbers. If there is only 1 page, state if the article is an abstract or letter. The last names and initials of all the authors up to 6 should be included, but when there are more than 6 authors, include the last names and initials of the first 6 authors only, followed by “et al”.
- Abbreviations for journal names should conform to those used in MEDLINE.
- If citing a website, provide the author information, article title, website address and the date you accessed the information.

Chen CC, Wang SS, Tsay SH, Lee FY, Lu RH, Chang FY, et al. Effects of nitric oxide synthase inhibitors on retrograde bile salt-induced pancreatitis rats. *J Chin Med Assoc* 2004;67:9-14.

The pathogenesis of ET still remains uncertain. The study of pathology has not showed any evidence of structure lesion in the brain.¹⁵ TMS was able to reset the rhythm of ET but not the heart beat. Also, the pacing mechanism was different between ET and heart beat. Positron emission tomography of patients with ET reveals increased cerebellar activity at rest and during tremor, indicating that cerebellum has an important role in the generation of ET through the mechanism of oscillation within cerebello-olivary path-

- **End of Paragraph** : 如果您的書目格式是需要換行的，您就需要點選End of Paragraph 來做換行的動作。

- **Forced Separation**: 如果您的書目格式中，如果某些欄位是空白的，而在Word的參考文獻清單中，這些空白的資訊或是符號要忽略掉的話，您就需要使用 Forced Separation符號”|”，來將需要忽略的資訊欄位或是符號區隔開來

High-proton-conductive polymer electrolyte with a nanomatrix channel was prepared by graft copolymerization of styrene onto deproteinized natural rubber followed by sulfonation with chlorosulfonic acid.¹ First, natural rubber latex was purified with urea in the presence of surfactant to remove almost all proteins present in the rubber. Second, graft copolymerization of styrene onto deproteinized natural rubber was carried out with tert-butyl hydroperoxide/tetraethylenepentamine as an initiator at 30 degrees C in latex stage.²

若我的文章中，同時會引用中文和英文的書目格式，該如何將兩份文件合併呢？

"This new edition is needed to provide junior doctors and GPs with a comprehensive overview of urology focusing on the diagnosis and management of the most common urological conditions. Urology as a specialty is undergoing continuing technological and scientific innovation and there have been many recent changes to urology practice in favour of less invasive methods over surgeries. (Dawson & Nethercliffe, 2012) This edition will include the new techniques and procedures that have been developed since 2006 that allow for safer and more effective treatment"--Provided by publisher. Mumps, measles and rubella (MMR) are serious diseases that can lead to potentially fatal illness, disability and death. However, public debate over the safety of the trivalent MMR vaccine and the resultant drop in vaccination coverage in several countries persists, despite its almost universal use and accepted effectiveness. OBJECTIVES: To assess the effectiveness and adverse effects associated with the MMR vaccine in children up to 15 years of age. SEARCH METHODS: For this update we searched the Cochrane Central Register of Controlled Trials (CENTRAL) (The Cochrane Library 2011, Issue 2).

1.先在文章內插入
英文的Citations(並
使用英文的格式，
如APA 6th)

2.插入全部的英文
格式後，移除此份
文件的參數。

移除參數：

1.從 Bibliography的 Covert Citations and Bibliography下的 Covert to Plain Text。

2.請另存一份移除參數的Word檔，保留有參數的檔案，以方便日後再運用。

3.請在這份沒有參數的文件中，繼續插入中文的Citations(請改成中文的APA格式，如APA_6_TW_021)

4.在這份文件中，可以發現中文的參考書目會列在英文的參考書目下方
