

ProQuest 醫學資料庫介紹

Health Research Premium Collection

ProQuest®
Part of Clarivate

Health Research Premium Collection

- 課程目標/Objectives
 - 了解Health Research Premium Collection有收錄哪些資源與文獻內容
 - 如何利用檢索平台的各種搜尋功能獲取所需的文獻與資料

Health Research Premium Collection

包含以下醫學相關資料庫:

(1) Health and Medical Collection	收錄許多指標性的醫學刊物及內容
(2) Consumer Health Database	家庭醫學
(3) Healthcare Administration Database	醫護管理
(4) Nursing & Allied Health Database	護理及健康照護
(5) Psychology Database	心理
(6) Public Health Database	公共衛生
(7) MEDLINE	美國國家醫學圖書館所推出,收錄生物醫學期刊索引與摘要

Health Research Premium Collection

6千多種出版品 (其中5千多種為知名學術期刊)

超過12萬篇論文全文

將近17萬筆個案研究全文

醫學專業新聞出版品,會議報告,會議紀錄,電子書,...

Health Research Premium Collection

內容來自世界各地知名的出版社

...with leading publishers of scholarly journals

Health Research Premium Collection

(1) Health and Medical Collection:

涵蓋了所有主要的醫學領域和臨床主題，超過3千多種學術期刊，並收錄了上百本電子書，另外還提供醫學相關雜誌與報告

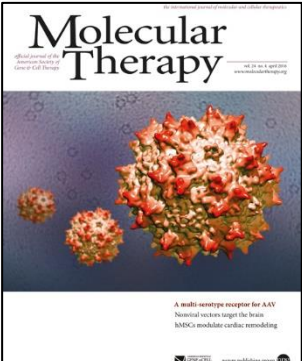

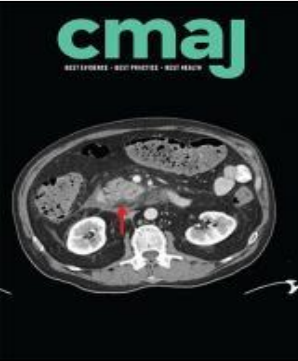

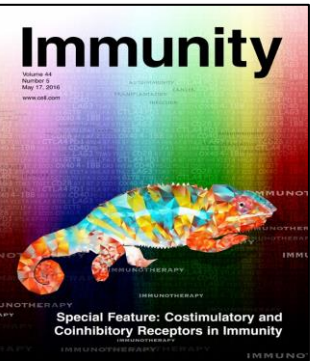

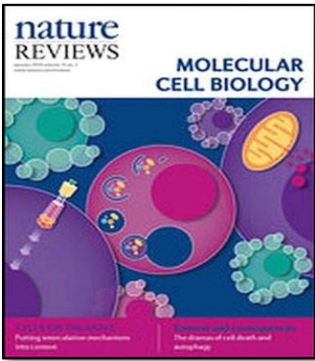

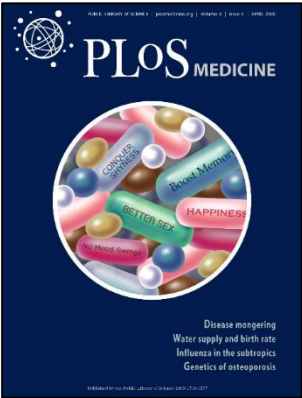

解剖學	造血系統疾病	寄生蟲學
生物化學	免疫學	病理學
心血管疾病	淋巴系統疾病	小兒科
傳染病	微生物學	藥理學
皮膚科	肌肉骨骼疾病	生理學
消化系統疾病	神經系統	精神病學
內分泌疾病	產科醫學	呼吸系統疾病
老人醫學	眼科學	外科醫學
婦產科	耳鼻喉科學	泌尿生殖系統疾病

Health Research Premium Collection

(1) Health and Medical Collection:

收錄了各科知名且許多為 high impact factor 之學術期刊

Health Research Premium Collection

New England Journal of Medicine
ranked #1 in general medicine periodicals

MASSACHUSETTS
MEDICAL SOCIETY

Every physician matters, each patient counts.

The Lancet
ranked #2 in general medicine periodicals

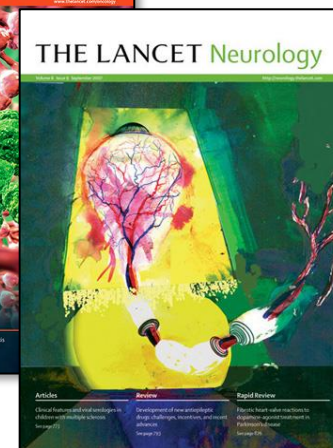

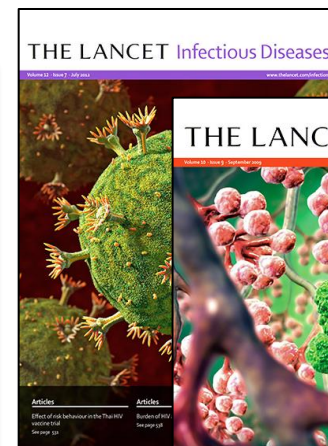

- ✓ 為醫學期刊中擁有最高影響指數之刊物
- ✓ 同出版社所出的JournalWatch系列也已收錄在ProQuest平台上

- JournalWatch has several specialties: Cardiology, Emergency Medicine, Gastroenterology, General Medicine, Hospital Medicine, Infectious Diseases, Neurology, Oncology and Hematology, Pediatrics and Adolescent Medicine, Psychiatry, Women's Health

- ✓ 為醫學期刊中擁有第二高影響指數之刊物
- ✓ 同系列的Lancet Oncology, Lancet Neurology and Lancet Infectious Diseases也都收錄在ProQuest平台上

Health Research Premium Collection

BMJ

Nature

✓ 收錄超過60多種BMJ Group旗下的期刊

✓ 超過50多種Nature旗下刊物加入

Health Research Premium Collection

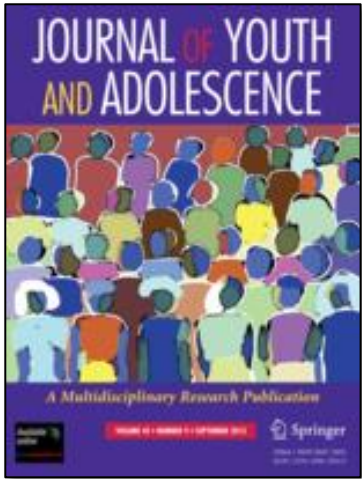

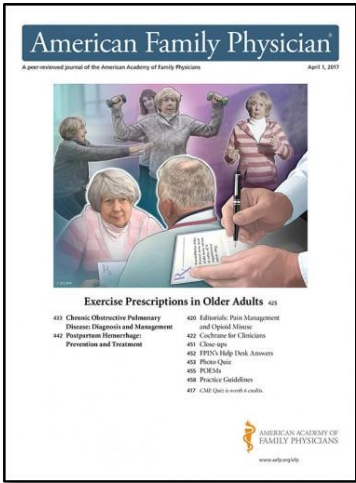

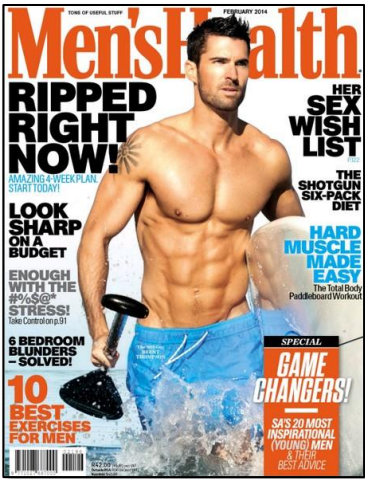

(2) Consumer Health Database:

收錄廣泛的大眾健康題材內容，來自超過190多個出版社，超過500多種全文期刊，雜誌，新聞及醫學相關出版品

牙科	助產	運動傷害
眼睛保養	食品營養	婦女健康

收錄了以下知名刊物

Health Research Premium Collection

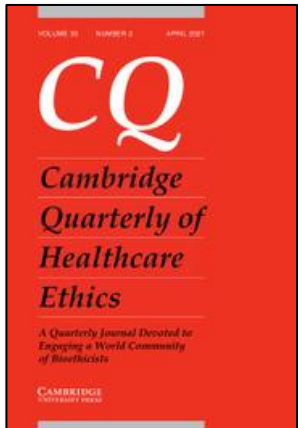

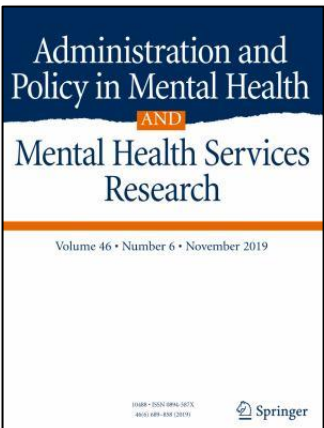

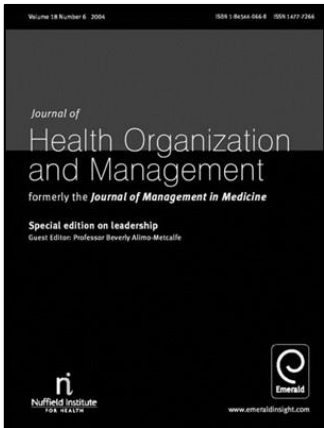

(3) Healthcare Administration Database:

設計給衛生管理相關領域的研究人員，收錄來自超過上百家出版社之多過5百多種學術期刊，上千種出版品

商業管理	醫院	人事管理
倫理學	保險	公共衛生管理
衛生經濟學	法律	統計

收錄了以下知名刊物

Health Research Premium Collection

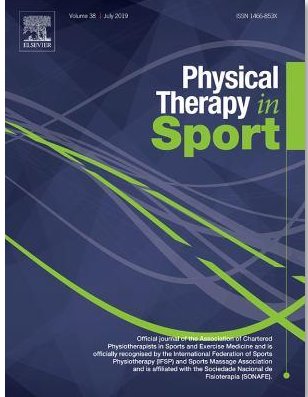

(4) Nursing & Allied Health Database:

提供護理及專職醫療健康照護領域的資料庫，收錄上千種學術期刊，超過2千種出版品

內分泌學	護理	物理治療
老年醫學	營養學	心理學及精神病學
醫療機構與管理	腫瘤學	公共衛生
醫學科學	小兒科	放射學與核子醫學
心理健康	藥學及藥理學	社會服務及福利

收錄了以下知名刊物

Health Research Premium Collection

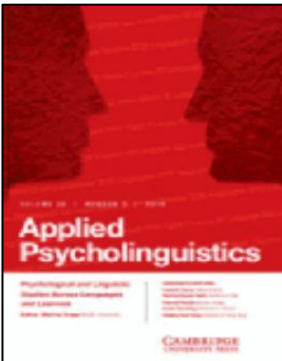

(5) Psychology Database:

心理學資料庫提供指標性心理學刊物全文，並提供多樣化的資訊內容，幫助使用者在理論與實踐間取得平衡

行為心理學	神經內科	心理測量
臨床心理學	人格	社會心理學
發展心理學	心理生物學	

收錄了以下知名刊物

Health Research Premium Collection

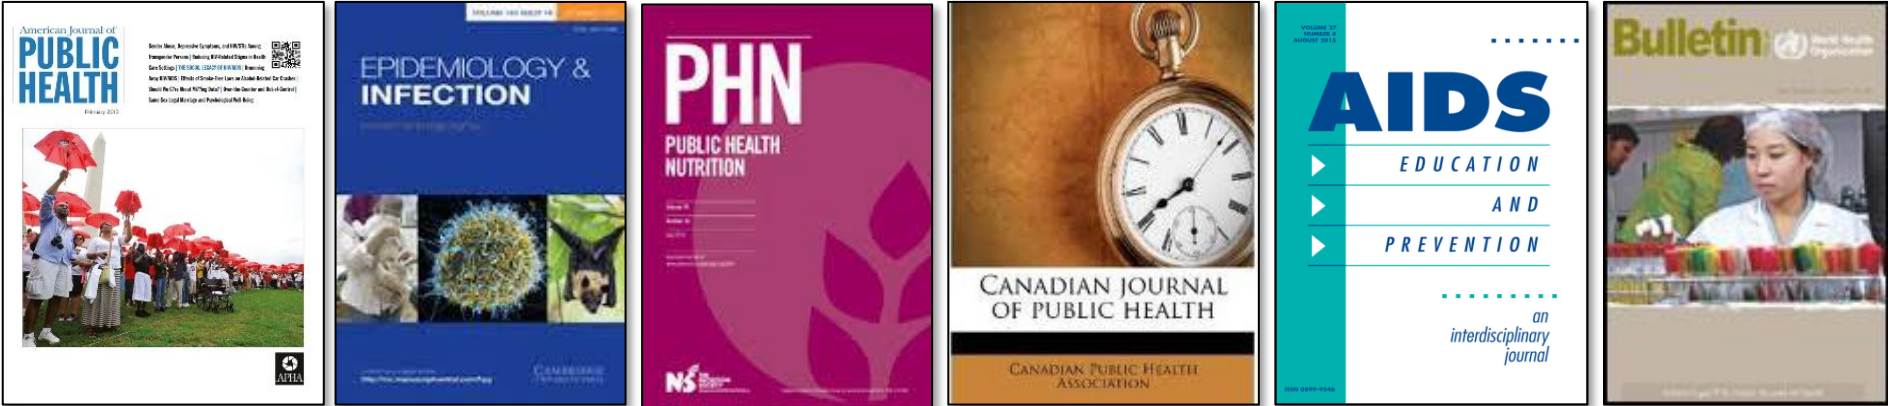

(6) Public Health Database:

結合了多元性的出版品內容來協助使用者獲取公共衛生領域最即時的資訊

生物統計學	衛生服務管理
環境健康科學	國際公共衛生
流行病學	職業安全與健康

收錄了以下知名刊物

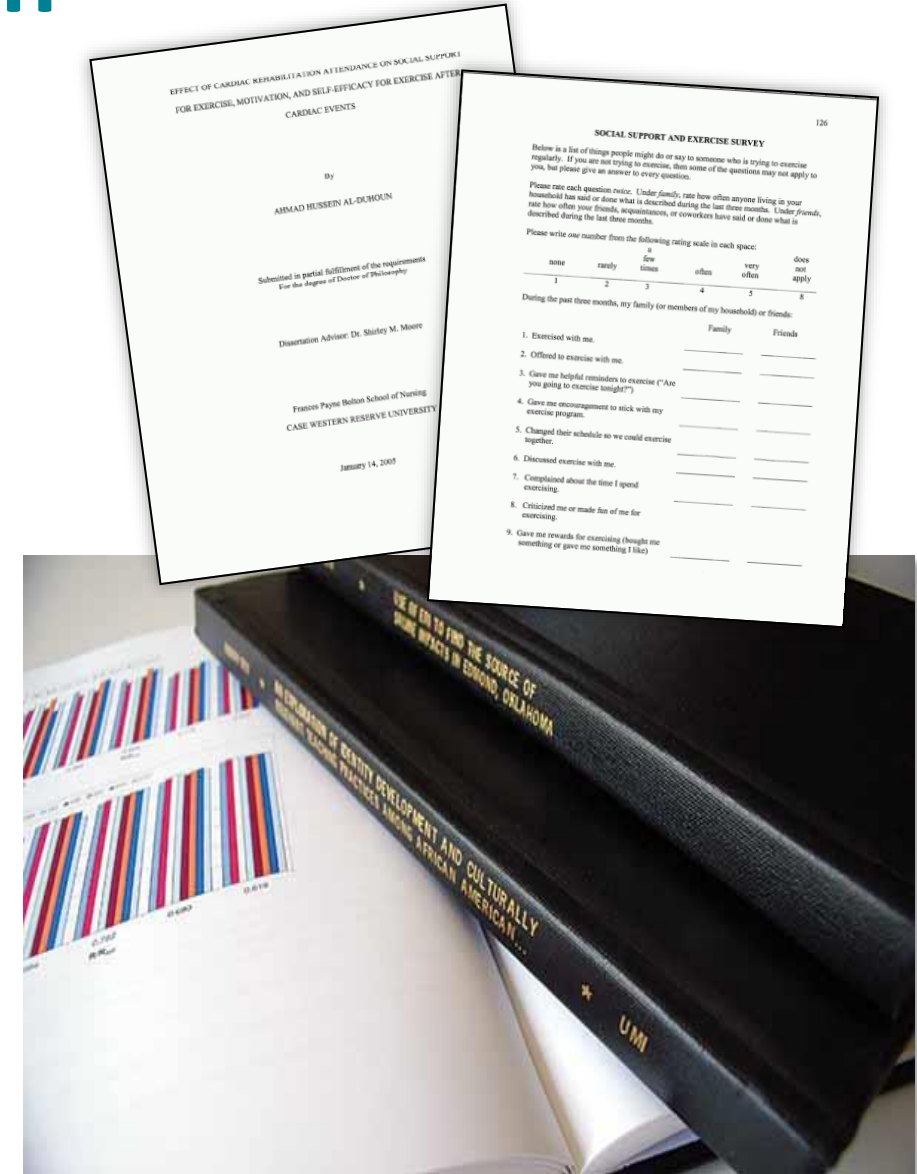

Health Research Premium Collection

Dissertations 論文

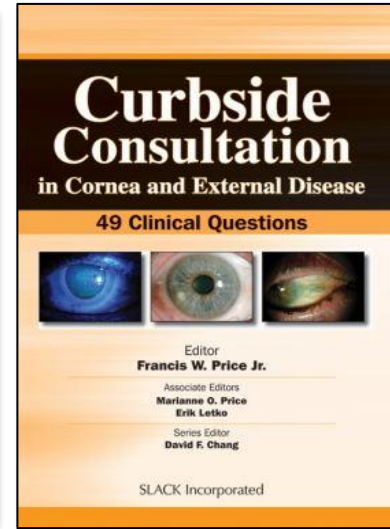

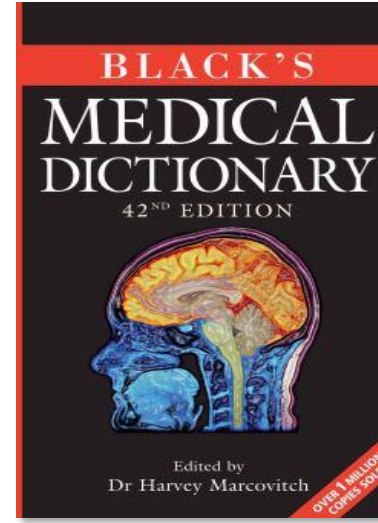

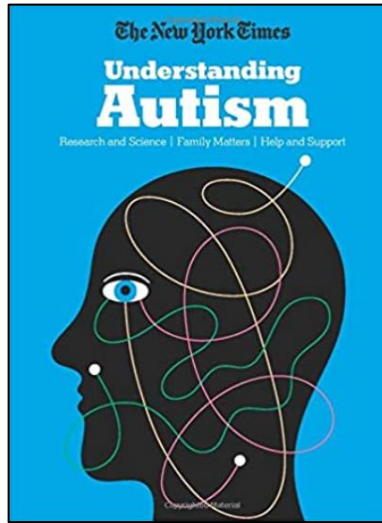

Full-Text Dissertations - an important part of research

- 除了期刊，ProQuest也提供龐大的論文資料來幫助研究
- 目前已收錄超過114,000篇論文全文，數量持續不斷增加中
- 論文來自世界各地著名的大學學院
- 提供尚未發表在期刊的最新研究與想法

Health Research Premium Collection

ProQuest資料庫內也收錄了醫學專業新聞，學會出版品，書籍，報紙與雜誌

ProQuest 醫學資料庫檢索平台介紹

Health Research Premium Collection

ProQuest平台

簡易檢索技巧:

- A **and** B 或是 A(空格)B: 結果中必須都含有A及B兩字詞
- A **or** B: 結果中要有A或是B或是兩者皆有
- A **not** B: 結果中要有A但不能有B這個字詞
- “A B” : 結果必須含有A 、B兩字詞且完全符合(A,B緊鄰未拆開)
- NEAR/n (N/n) 尋找包含相隔指定字數內的兩個檢索詞 (順序不限)
- PRE/n (P/n) 尋找包含在第二個檢索詞之前指定字數內出現的另一個檢索詞
- NEAR>PRE>AND>OR>NOT (請使用括號來設定運算元優先權)

問號 ? (用來取代任一個單一字元,可以使用多個?號來代表多個字元)

nurse? 結果：nurses、nursed，但不是 nurse

sm?th 結果：smith 和 smyth

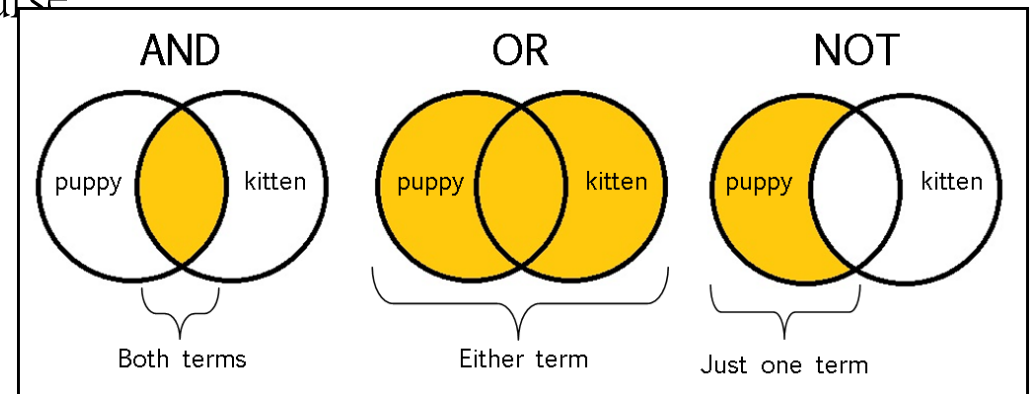

ad??? 結果：added、adult、adopt

星號 * (代表0至5個字元)

nurse* 結果：nurse、nurses、nursed

colo*r 結果：colour、color

(註: ?,*不可使用在關鍵詞的開頭)

摘要 (摘要)

Smoking a cigarette generates over 4000 chemicals that have a deleterious impact on each part of the human body. It produces three main severe effects on the liver organ: oncogenic, immunological, and indirect or direct toxic effects. It results in the production of cytotoxic substances, which raises fibrosis and necro-inflammation. Additionally, it also directs the production of pro-inflammatory cytokines tumour necrosis factor alfa (TNF- α) and interleukins (IL-1 β , IL-6) that will be responsible for the chronic liver injury. Furthermore, it gives rise to secondary polycythemia and successively raises the turnover and mass of red cells, which might be a common factor responsible for the development of oxidative stress in the liver due to iron overload. It also produces chemicals that are having oncogenic properties and raises the risk of liver cancer especially in sufferers of chronic hepatitis C. Smoking modulates both humoral and cell-mediated responses by restricting the proliferation of lymphocytes and inducing their apoptosis and ultimately decreasing the surveillance of cancer cells. Moreover, it has been determined that heavy smoking impacts the response of hepatitis C patients to interferon (IFN) therapy through different mechanisms, which can be improved by phlebotomy. Efforts are being made in different ...

Smoking a cigarette generates over 4000 chemicals that have a deleterious impact on each part of the human body. It produces three main severe effects on the liver organ: oncogenic, immunological, and indirect or direct toxic effects. It results in the production of cytotoxic substances, which raises fibrosis and necro-inflammation. Additionally, it also directs the production of pro-inflammatory cytokines tumour necrosis factor alfa (TNF- α) and interleukins (IL-1 β , IL-6) that will be responsible for the chronic liver injury. Furthermore, it gives rise to secondary polycythemia and successively raises the turnover and mass of red cells, which might be a common factor responsible for the development of oxidative stress in the liver due to iron overload. It also produces chemicals that are having oncogenic properties and raises the risk of **liver cancer** especially in sufferers of chronic hepatitis C. Smoking modulates both humoral and cell-mediated responses by restricting the proliferation of lymphocytes and inducing their apoptosis and ultimately decreasing the surveillance of cancer cells. Moreover, it has been determined that heavy smoking impacts the response of hepatitis C patients to interferon (IFN) therapy through different mechanisms, which can be improved by phlebotomy. Efforts are being made in different nations in decreasing the prevalence of smoking to improve premature death and ill effects of their nation's individuals.

Smoking is a leading cause of cancer and is responsible for approximately 1000 chemicals that have a deleterious impact on each part of the human body. It produces three main severe effects: immunological, and indirect or direct toxic effects. It results in the production of cytotoxic substances, which raise the risk of cancer. Additionally, it also directs the production of pro-inflammatory cytokines tumour necrosis factor alfa (TNF- α) and interleukins (IL-1 β , IL-6) that will be responsible for the chronic liver injury. Furthermore, it gives rise to secondary polycythemia and successively raises the turnover and mass of red cells, which might be a common factor responsible for the development of oxidative stress in the liver due to iron overload. It also produces chemicals that are having oncogenic properties and raises the risk of **liver cancer** especially in sufferers of chronic hepatitis C. Smoking modulates both humoral and cell-mediated responses by restricting the proliferation of lymphocytes and inducing their apoptosis and ultimately decreasing the surveillance of cancer cells. Moreover, it has been determined that heavy smoking impacts the response of hepatitis C patients to interferon (IFN) therapy through different mechanisms, which can be improved by phlebotomy. Efforts are being made in different nations in decreasing the prevalence of smoking to improve premature death and ill effects of their nation's individuals.

目录

检索

基本檢索

检索 > 基本檢索

检索學科領域

輸入一或多個字詞，然後按一下 [檢索]。
接著就可觀察您的檢索結果。開啟及檢視您關注的文件。文件可能是任何資料，包括報紙文章、相片、PDF 或視訊等。

須知事項

ProQuest 如何處理您輸入的字詞：
ProQuest 會在所有選定資料庫中所有文件的所有欄位中尋找您的字詞 (檢索術語)，包括任何可用的摘要或全文。
當輸入一個以上的字詞 (例如 **shale oil**) 時，ProQuest 會在任何欄位中尋找同時包含 **shale** 和 **oil** 的文件，包括任何可用的摘要或全文。

檢索確切的片語
使用引號括住您的字詞 - “**eternal love**” 或 “**life after death**” - 強制 ProQuest 將您的字詞只當成一個片語尋找，而不是分開尋找每個字詞。

查看您正在檢索哪些資料庫
您目前正在檢索哪些資料庫的相關資訊會在 ProQuest 視窗上方的藍色列中顯示。以下是顯示情形的範例：
您正在檢索: **81 個資料庫** (請參閱清單 | 變更 >>)
使用連結檢視目前的清單及選擇或取消選擇資料庫。
